

Orbis SICAV Global Equity Fund

Investor Share Class

The Fund is actively managed and designed to be exposed to all of the risks and rewards of selected global equities. It aims to earn higher returns than world stockmarkets, without greater risk of loss. The performance fee benchmark ("Benchmark") of the Class is the FTSE World Index, including income, gross of withholding taxes, in euro ("FTSE World Index"). Currency exposure is managed separately to equity exposure.

Fund Objective and Benchmark

The Fund is designed to be exposed to all of the risks and rewards of selected global equities. It seeks higher returns than the average of the world's equity markets, without greater risk of loss. The Fund aims for higher returns than a designated performance benchmark, namely the FTSE World Index, including income and before the deduction of withholding taxes ("FTSE World Index").

How We Aim to Achieve the Fund's Objective/Adherence to Objective

The Fund is actively managed and it invests in equities considered to offer superior fundamental value. These equities are selected using extensive proprietary investment research. Orbis devotes a substantial proportion of its business efforts to detailed "bottom up" investment research conducted with a long-term perspective, believing that such research makes superior long-term performance attainable. The lower the price of a share as compared to its assessed intrinsic value, the more attractive Orbis considers the equity's fundamental value. The Investment Manager believes that over the long term, equity investing based on this approach offers superior returns and reduces the risk of loss. The Fund may, to the extent permitted by its investment restrictions, also periodically hold cash and cash equivalents when Orbis believes this to be consistent with the Fund's investment objective.

Exchange rate fluctuations significantly influence global investment returns. For this reason, part of Orbis' research effort is devoted to forecasting currency trends. Taking into account these expected trends, Orbis actively reviews the Fund's currency exposure. In doing so, Orbis places particular focus on managing the Fund's exposure to those currencies considered less likely to hold their long-term value. The Fund's currency deployment therefore frequently differs significantly from the geographic deployment of its selected equities.

The Fund does not seek to mirror the FTSE World Index but may instead deviate meaningfully from it in pursuit of superior long-term capital appreciation.

Since inception and over the latest five-year period, the Fund has outperformed its benchmark net of fees. The Fund will experience periods of underperformance in pursuit of its long-term objective.

Risk/Reward Profile

- The Fund is aimed at investors who are seeking a portfolio, the objective of which is to invest in, and be exposed to, global equities and who therefore accept exposure to trends in world stockmarkets.
- Investments in the Fund may suffer capital loss.
- Investors should understand that the Investment Manager generally assesses an equity investment's attractiveness using a three-to-five year time horizon.

Management Fee

As is described in more detail in the Fund's Prospectus, the Fund's various share classes bear different management fees. The fees are designed to align the Manager's and Investment Manager's interests with those of investors in the Fund. With respect to the Investor Share Class, the fee is based on the net asset value of the Class. The fee rate is calculated weekly by comparing the Class' performance over three years against the FTSE World Index. For each percentage point of three year performance above or below that benchmark's performance, 0.04 percentage points are added to or deducted from 1.5%, subject to the following limits:

- Maximum fee: 2.5% per annum
- Minimum fee: 0.5% per annum

Please review the Fund's prospectus for additional detail and for a description of the management fee borne by the Fund's other share classes.

Fees, Expenses and Total Expense Ratio (TER)

The relevant class within the Fund bears all expenses payable by such class, which shall include but not be limited to fees payable to its Manager, Investment Manager and additional service providers, fees and expenses involved in registering and maintaining governmental registrations, taxes, duties and all other operating expenses, including the cost of buying and selling assets. Operating costs (excluding the Manager's and Investment Manager's fees described above under "Management Fee," the cost of buying and selling assets, interest and brokerage charges and certain taxes) attributable to the Fund's Investor Share Class are currently capped at 0.20% per annum of the net asset value of that class.

Where an investor subscribes or redeems an amount representing 5% or more of the net asset value of the Fund, the Manager may cause the Fund to levy a fee of 0.40% of the net asset value of the Fund's shares being acquired or redeemed.

The annual management fees charged are included in the TER. The TER is a measure of the actual expenses incurred by the Class over a 12 month period, excluding trading costs. Since Fund and Class returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns. Expenses may vary, so the current TER is not a reliable indicator of future TERs.

Legal Notices

Returns are net of fees, include income and assume reinvestment of dividends. Figures quoted are for the periods indicated for a \$10,000 investment (lump sum, for illustrative purposes only). Annualised returns show the average amount earned on an investment in the Fund/share class each year over the given time period. This Report does not constitute advice nor a recommendation to buy, sell or hold, nor an offer to sell or a solicitation to buy interests or shares in the Orbis Funds or other securities in the companies mentioned in it.

Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of an investment in the Fund may go down as well as up, and past performance is not a reliable indicator of future results. Neither the Manager nor the Investment Manager provides any guarantee with respect to capital or the Fund's returns. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Commission and incentives may be paid by investors to third parties and, if so, would be included in the overall costs. Individual investors' performance may differ as a result of investment date, reinvestment date and dividend withholding tax, as well as a levy that may apply in the case of transactions representing more than 5% of the Fund's net asset value. The Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.

The discussion topics for the commentaries were selected, and the commentaries were finalised and approved, by Orbis Investment Management Limited, the Fund's Investment Manager. Notes to Help You Understand This Report

Certain capitalised terms are defined in the Glossary section of the Orbis Funds' respective Prospectuses, copies of which are available upon request from Allan Gray Unit Trust Management (RF) Proprietary Limited, a Member of the Association for Savings & Investments SA. The country and currency classification for securities follows that of third-party providers for comparability purposes. Emerging Markets follows MSCI classification when available and includes Frontier Markets. Emerging Markets currency exposure is based on currency denomination. Based on a number of factors including the location of the underlying business, Orbis may consider a security's classification to be different and manage the Funds' exposures accordingly. Totals presented in this Report may not sum due to rounding. The Fund does not seek to mirror the investment universe of the Benchmark and is thus not constrained by the Benchmark's composition.

Risk measures are ex-post and calculated on a monthly return series. Drawdowns occur when the cumulative return of the Fund drops below its preceding peak. Months to recovery measures the number of months from the preceding peak in performance to recovery of that level of performance.

Beta compares the sensitivity of the periodic returns of a fund to those of an index. A beta of 1.0 implies that a percentage move in the index has been reflected by a similar percentage move in the fund, on average. A beta higher than 1.0 implies that a fund has proportionally more exposure to market volatility than the index.

Annualised Monthly Volatility measures the variability of monthly returns, adjusted to reflect an annual level. A higher value suggests greater volatility and risk, while a lower value indicates more stable returns.

Tracking error is a measure of the difference between a fund's return and the return of its benchmark. Low tracking error indicates that the fund is closely following its benchmark. High tracking error indicates the opposite.

12 month portfolio turnover for the Orbis Equity and Multi-Asset Class Funds is calculated as the lesser of total security purchases or sales in the Fund over the period, divided by the average net asset value (NAV) of the Fund. Cash, cash equivalents and short-term government securities are not included.

12 month name turnover for the Orbis Equity and Multi-Asset Class Funds is calculated as the number of positions held by the Fund at the start of the period but no longer held at the end of the period, divided by the total number of positions held by the Fund at the start of the period.

Active share is a measure of the extent to which the holdings of the Orbis Equity and Balanced Funds differ from their respective benchmark's holdings. It is calculated by summing the absolute value of the differences of the weight of each individual security in the specific Orbis Fund, versus the weight of each holding in the respective benchmark index, and dividing by two. For the Balanced Funds, three calculations of active share are disclosed. The Portfolio active share incorporates the equity, fixed income, commodity-linked and other securities (as applicable) held by the Orbis Fund and compares those to the holdings of the composite benchmark. The Equity and Fixed Income active shares are calculated as if the equity and fixed income portions of the Orbis Funds are independent funds; each of those two sets of holdings is separately compared to the fully-weighted holdings in the appropriate component of the composite benchmark. Although the Balanced Funds hedge stock and bond market exposure, the active share calculations are "gross" and not adjusted to reflect the hedging in place at any point in time.

Benchmark related information is as at the date of production based on data provided by the official benchmark and/or third party data providers. There may be timing differences between the date at which data is captured and reported.

The total expense ratio has been calculated using the expenses, excluding trading costs, and average net assets for the 12 month period ending 31 August 2025.

Orbis SICAV Funds: The Fund expenses exclude portfolio transaction costs. The performance related management fee becomes payable to Orbis on each Dealing Day as defined in the Funds' Prospectus.

Additional Notices

This is a marketing communication for the purposes of the Bermuda Monetary Authority's investment business rules and ESMA guidelines on marketing materials. You should consider the relevant offering documents including the Fund Prospectus and Key Information document (for a SICAV Fund) before making any final investment decisions. These offering documents are available in English on our website (www.orbis.com). Please refer to the respective Fund's Prospectus for full information on the risks associated with investing.

Investors in a SICAV Fund can obtain a summary of their investor rights in English on our website (www.orbis.com). When investing in the Orbis Funds an investor acquires shares within the Fund and not in the underlying assets held within the Fund. The return of your investment may change as a result of currency fluctuations if the return is calculated in a currency different from the currency shown in this Report.
