

Orbis SICAV

International Equity Fund

Investor Share Class

The Fund is actively managed and designed to be exposed to all of the risks and rewards of a portfolio of selected non-US equities. It aims for higher returns than a designated benchmark ("Benchmark"), namely the MSCI All Country World Index ex-USA, including income and net of withholding taxes ("MSCI ACWI ex-USA Index"). Currency exposure is managed relative to that of the MSCI ACWI ex-USA Index.

Growth of US\$10,000 investment, net of fees, dividends reinvested

On 1 June 2017, the Benchmark for the Orbis SICAV International Equity Fund changed from the MSCI World ex-USA Index to the MSCI All Country World Index ex-USA, both including income and net of withholding taxes. Data above and Returns for the period before 1 June 2017 relate to the MSCI World ex-USA Index.

Fund Objective and Benchmark

The Fund is designed to be exposed to all of the risks and rewards of a portfolio of selected non-US equity investments; it expects to be not less than 90% invested in international equities outside of the US but may also invest in US equities. The Fund aims for superior long-term returns relative to a designated performance benchmark, namely the MSCI All Country World Index ex-USA, including income and net of withholding taxes (the "MSCI ACWI ex-USA Index").

How We Aim to Achieve the Fund's Objective/Adherence to Objective

The Fund is actively managed and it invests in equities considered to offer superior fundamental value. These equities are selected using extensive proprietary investment research. Orbis devotes a substantial proportion of its business efforts to detailed "bottom up" investment research conducted with a long-term perspective, believing that such research makes superior long-term performance attainable. The lower the price of a share as compared to its assessed intrinsic value, the more attractive Orbis considers the equity's fundamental value. The Investment Manager believes that over the long term, equity investing based on this approach offers superior returns and reduces the risk of loss. The Fund may, to the extent permitted by its investment restrictions, also periodically hold cash and cash equivalents when Orbis believes this to be consistent with the Fund's investment objective.

Exchange rate fluctuations significantly influence global investment returns. For this reason, part of Orbis' research effort is devoted to forecasting currency trends. Taking into account these expected trends, Orbis actively reviews the Fund's currency exposure. In doing so, Orbis places particular focus on managing the Fund's exposure to those currencies considered less likely to hold their long-term value. The Fund's currency deployment therefore frequently differs significantly from the geographic deployment of its selected equities.

The Fund does not seek to mirror the MSCI ACWI ex-USA Index but may instead deviate meaningfully from it in pursuit of superior long-term capital appreciation.

Since inception, the Fund (net of fees) has outperformed its benchmark. The Fund will experience periods of underperformance in pursuit of its long-term objective.

Risk/Reward Profile

- The Fund is aimed at investors who are seeking a portfolio, the objective of which is to invest in, and be exposed to, international equities and who therefore accept exposure to trends in stockmarkets.
- Investments in the Fund may suffer capital loss.
- Investors should understand that the Investment Manager generally assesses an equity investment's attractiveness using a three-to-five year time horizon.

Management Fee

As is described in more detail in the Fund's Prospectus, the Fund's various share classes bear different management fees. The fees are designed to align the Manager's and Investment Manager's interests with those of investors in the Fund. With respect to the Investor Share Class, the fee is based on the net asset value of the Class. The fee rate is calculated weekly by comparing the Class' performance over three years against the MSCI ACWI ex-USA Index. For each percentage point of three year performance above or below that benchmark's performance, 0.04 percentage points are added to or deducted from 1.5%, subject to the following limits:

- Maximum fee: 2.5% per annum
- Minimum fee: 0.5% per annum

Please review the Fund's prospectus for additional detail and for a description of the management fee borne by the Fund's other share classes.

Fees, Expenses and Total Expense Ratio (TER)

The relevant class within the Fund bears all expenses payable by such class, which shall include but not be limited to fees payable to its Manager, Investment Manager and additional service providers, fees and expenses involved in registering and maintaining governmental registrations, taxes, duties and all other operating expenses, including the cost of buying and selling assets. Operating costs (excluding the Manager's and Investment Manager's fees described above under "Management Fee," the cost of buying and selling assets, interest and brokerage charges and certain taxes) attributable to the Fund's Investor Share Class are currently capped at 0.20% per annum of the net asset value of that class.

Where an investor subscribes or redeems an amount representing 5% or more of the net asset value of the Fund, the Manager may cause the Fund to levy a fee of 0.50% of the net asset value of the Fund's shares being acquired or redeemed.

The annual management fees charged are included in the TER. The TER is a measure of the actual expenses incurred by the Class over a 12 month period, excluding trading costs. Since Fund and Class returns are quoted after deduction of these expenses, the TER should not be deducted from the published returns. Expenses may vary, so the current TER is not a reliable indicator of future TERs.

Legal Notices

Returns are net of fees, include income and assume reinvestment of dividends. Figures quoted are for the periods indicated for a \$10,000 investment (lump sum, for illustrative purposes only). Annualised returns show the average amount earned on an investment in the Fund/share class each year over the given time period. This Report does not constitute advice nor a recommendation to buy, sell or hold, nor an offer to sell or a solicitation to buy interests or shares in the Orbis Funds or other securities in the companies mentioned in it.

Collective Investment Schemes (CIS) are generally medium to long-term investments. The value of an investment in the Fund may go down as well as up, and past performance is not a reliable indicator of future results. Neither the Manager nor the Investment Manager provides any guarantee with respect to capital or the Fund's returns. CIS are traded at ruling prices and can engage in borrowing and scrip lending. Commission and incentives may be paid by investors to third parties and, if so, would be included in the overall costs. Individual investors' performance may differ as a result of investment date, reinvestment date and dividend withholding tax, as well as a levy that may apply in the case of transactions representing more than 5% of the Fund's net asset value. The Fund may be closed to new investments at any time in order to be managed in accordance with its mandate. The Fund invests in foreign securities. Depending on their markets, trading in those securities may carry risks relating to, among others, macroeconomic and political circumstances, constraints on liquidity or the repatriation of funds, foreign exchange rate fluctuations, taxation and trade settlement.

The discussion topics for the commentaries were selected, and the commentaries were finalised and approved, by Orbis Investment Management Limited, the Fund's Investment Manager. Investor Notification regarding Prospectus Amendments

The Boards of Orbis Global Equity Fund Limited, Orbis Institutional Funds Limited, Orbis Japan Equity (US\$) Fund Limited, Orbis Optimal Overlay Funds Limited, Orbis Optimal SA Fund Limited, Orbis Optimal (US\$) Fund Limited, and Selection of Orbis Funds Limited (the "Bermuda Funds"), in addition to, where applicable as indicated below, the Board of the Orbis SICAV (the Orbis SICAV and the Bermuda Funds together, the "Funds"), have approved changes to the Funds' prospectuses to reflect the following matters:

- The daily management of the Fee Reserve movements in our Bermuda Funds and the Orbis SICAV will soon be administered exclusively through fund accounting systems rather than relying on share registries (share registers themselves will continue to be kept and maintained in compliance with law and regulation). Fee Reserve shares, which are owned solely by Orbis Investment Management Limited as the "Investment Manager" of the Funds, are due to be redeemed and immediately reissued to the Investment Manager as a static class with a fixed number of shares (rather than the currently variable number of shares); there will be one Fee Reserve share class per currency per Fund (or, as applicable, per sub-fund or segregated account), and the Investment Manager will continue to own all Fee Reserve shares. This proposed change and any associated operational changes, which are being made for reasons of operational and administrative efficiency only, are not expected to have any impact on clients (and, for the avoidance of doubt, no change is being made in relation to the calculation of the net asset value of share classes held by investors, or to performance fees (including calculation, accruals and refunds)). Subject to any outstanding regulatory approvals, this change is expected to take effect on 1 May 2025.
- The Investment Manager has appointed its affiliate Orbis Investments (Canada) Limited as its investment advisor in respect of the Funds.
- The Investment Manager has appointed its affiliate Orbis Investment Advisory (Norway) AS as its investment advisor in respect of the Bermuda Funds.
- In respect of the Bermuda Funds, holders of shares issued on or after 1 May 2025 will receive those shares in uncertificated form only. Investors will continue to be able to request physical share certificates in respect of shares issued before 1 May 2025.
- Katharine Summerley has been appointed as Secretary of each of the Bermuda Funds, effective 1 May 2025.
- For certain Funds, those Funds' prospectuses have been updated to refer to commodity-linked instruments that are eligible investments under applicable regulations as examples of exchange-traded derivatives those Funds may transact in, consistent with the relevant Funds' Investment Objective as determined by the Investment Manager.

Notes to Help You Understand This Report

Certain capitalised terms are defined in the Glossary section of the Orbis Funds' respective Prospectuses, copies of which are available upon request from Allan Gray Unit Trust Management (RF) Proprietary Limited, a Member of the Association for Savings & Investments SA. The country and currency classification for securities follows that of third-party providers for comparability purposes. Emerging Markets follows MSCI classification when available and includes Frontier Markets. Emerging Markets currency exposure is based on currency denomination. Based on a number of factors including the location of the underlying business, Orbis may consider a security's classification to be different and manage the Funds' exposures accordingly. Totals presented in this Report may not sum due to rounding. The Fund does not seek to mirror the investment universe of the Benchmark and is thus not constrained by the Benchmark's composition.

Risk measures are ex-post and calculated on a monthly return series. Drawdowns occur when the cumulative return of the Fund drops below its preceding peak. Months to recovery measures the number of months from the preceding peak in performance to recovery of that level of performance.

Beta compares the sensitivity of the periodic returns of a fund to those of an index. A beta of 1.0 implies that a percentage move in the index has been reflected by a similar percentage move in the fund, on average. A beta higher than 1.0 implies that a fund has proportionally more exposure to market volatility than the index.

Annualised Monthly Volatility measures the variability of monthly returns, adjusted to reflect an annual level. A higher value suggests greater volatility and risk, while a lower value indicates more stable returns.

Tracking error is a measure of the difference between a fund's return and the return of its benchmark. Low tracking error indicates that the fund is closely following its benchmark. High tracking error indicates the opposite.

12 month portfolio turnover for the Orbis Equity and Multi-Asset Class Funds is calculated as the lesser of total security purchases or sales in the Fund over the period, divided by the average net asset value (NAV) of the Fund. Cash, cash equivalents and short-term government securities are not included.

12 month name turnover for the Orbis Equity and Multi-Asset Class Funds is calculated as the number of positions held by the Fund at the start of the period but no longer held at the end of the period, divided by the total number of positions held by the Fund at the start of the period.

Active share is a measure of the extent to which the holdings of the Orbis Equity and Balanced Funds differ from their respective benchmark's holdings. It is calculated by summing the absolute value of the differences of the weight of each individual security in the specific Orbis Fund, versus the weight of each holding in the respective benchmark index, and dividing by two. For the Balanced Funds, three calculations of active share are disclosed. The Portfolio active share incorporates the equity, fixed income, commodity-linked and other securities (as applicable) held by the Orbis Fund and compares those to the holdings of the composite benchmark. The Equity and Fixed Income active shares are calculated as if the equity and fixed income portions of the Orbis Funds are independent funds; each of those two sets of holdings is separately compared to the fully-weighted holdings in the appropriate component of the composite benchmark. Although the Balanced Funds hedge stock and bond market exposure, the active share calculations are "gross" and not adjusted to reflect the hedging in place at any point in time.

Benchmark related information is as at the date of production based on data provided by the official benchmark and/or third party data providers. There may be timing differences between the date at which data is captured and reported.

The total expense ratio has been calculated using the expenses, excluding trading costs, and average net assets for the 12 month period ending 30 April 2025.

Orbis SICAV Funds: The Fund expenses exclude portfolio transaction costs. The performance related management fee becomes payable to Orbis on each Dealing Day as defined in the Funds' Prospectus.
